

What to ask at your next doctor's visit:

- What genetic tests are offered at Sanford Health?
- Would genetic testing be right for me?
- How can I find out if I'm at risk for a hereditary disease?
- How would Sanford Health use my genetic test results in my care?
- What is pharmacogenetic testing and how would knowing how my body reacts to drugs help me?
- Should I consider seeing a genetic counselor and what are my options at Sanford Health?
